Immunology and Cell Biology (2002) **80**, 588–594

Subject index

A

1α,25-dihydroxyvitamin D_3
  Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
3D–QSAR
  Quantitative computational vaccinology 270
activation-induced cell death
  Activation-induced cell death and the tumour counterattack 131
activator protein-1
  α-Lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
activity profile
  Bioinformatic analysis and design of peptides 286
additive method
  Quantitative computational vaccinology 270
adhesion molecules
  Origins and destinations of dendritic cells 448
  Recruitment of lymphocytes to the human liver 52
adjuvant
  Mucosal immunity in the possum 358
adjuvant arthritis
  Thoracic duct lymphoblasts in arthritis 148
adoptive transfer
  Thoracic duct lymphoblasts in arthritis 148
albumin
  Trends in mucosal immunity in Antarctica 382
algorithm
  Epitope-driven vaccine design 257
allergy
  Computational immunology 248
animal disease models
  Thoracic duct lymphoblasts in arthritis 148
Antarctica
  Trends in mucosal immunity in Antarctica 382
antigen
  Vaccination against tuberculosis with plasmid-encoded cytokines 346
antigen presentation
  processing
    Susceptibility of mouse keratinocytes to lysis 415
antigen presentation
  Dendritic cells in tolerance and immunity 463
  Experimental autoimmune encephalomyelitis induction with dendritic cells 14
  Primary T-cell activation within the liver 84
antigenic peptides
  Bioinformatic analysis and design of peptides 286
antioxidant
  α-Lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
apoptosis
  Apoptotic cells produce transforming growth factor-β and interleukin-4 537
  T-cell apoptosis in the liver 74
  Tumour necrosis factor contributes to immunopathology 436
artificial neural network
  Identification of herpes simplex virus T-cell epitopes 300
asexual blood stage
  Immunity to asexual blood stage malaria 401
atomic force microscopy
  Non-viral gene transfer 119
autoimmune diabetes
  Non-obese diabetic genes and dendritic cells 198
autoimmune disease
  Nuclear RelB$^+$ cells in human tissues 164
autoimmune hepatitis
  Animal models of autoimmune liver disease 113
autoimmune inflammatory lesions
  Dendritic cells, chemokines and autoimmune diseases 497
autoimmunity
  Computational immunology 248
  Experimental autoimmune encephalomyelitis induction with dendritic cells 14
  Regulatory T cells and autoimmunity
  Nitric oxide in experimental autoimmune encephalomyelitis susceptibility 188
  Thoracic duct lymphoblasts in arthritis 148
  Tolerogenic function of immature dendritic cells 477

B

bacillus Calmette Guerin
  Vaccination with interleukin-2 and interleukin-18 secreting bacillus Calmette Guerin 209
B-cell differentiation
  Does recycling in germinal centres exist? 30
B-cell kinetics
  Does recycling in germinal centres exist? 30
B-cell proliferation
  Does recycling in germinal centres exist? 30
binding affinity prediction
  Quantitative computational vaccinology 270
binding affinity
  Bioinformatic analysis and design of peptides 286
bioinformatics
  Computational immunology 248
  Epitope-driven vaccine design 257
biosensing techniques
  Tamm-Horsfall binding to C 1q and C 1 558
brushtail possum
  Mucosal immunity in the possum 358

C

cancer
  Computational immunology 248
caspase
  Activation-induced cell death and the tumour counter-attack 131
castration
  Effect of Flt3 ligand upon murine prostate 370
CD 30
  Predicting treatment outcome in hepatitis C virus patients 391

CD25
CD25 and interleukin-2 signal transduction 351
CD28
Human $CD8^+CD28^-$ T cells 1
CD34
Adult hepatic haematopoietic stem cells 45
$CD34^+$
Dendritic cell progenitors are CMRF-44+ 216
CD4
Interleukin-dependent human leucocyte antigens modulation on T cells 138
$CD4^+$ $CD25^+$ T cells
Regulatory T cells and autoimmunity 567
CD56
Interaction between CD56 and fibroblast growth factor receptor 1 364
CD8 T lymphocyte
Characterization of herpes simplex virus-specific transgenic mice 156
CD8
Interleukin-dependent human leucocyte antigens modulation on T cells 138
$CD8^+$ T cells
Human $CD8^+CD28^-$ T cells 1
cellular automata
Recognition of mutants in human immunodeficiency virus infection 307
centroblasts
Does recycling in germinal centres exist? 30
centrocytes
Does recycling in germinal centres exist? 30
chemokine receptors
Dendritic cells, chemokines and autoimmune diseases 497
chemokine
Chemokines and dendritic cells 489
chemokines
Dendritic cells, chemokines and autoimmune diseases 497
Origins and destinations of dendritic cells 448
Recruitment of lymphocytes to the human liver 52
chemotaxis
Chemokines and dendritic cells 489
T-cell defects in Rac2-deficient mice 231
chimeric virus-like particles
Route of administration of chimeric BPV1 virus-like particles 21
chronic viral hepatitis
Hepatoimmunology: A perspective 36
CMRF-44
Dendritic cell progenitors are CMRF-44+ 216
combination therapy
Predicting treatment outcome in hepatitis C virus patients 391
complement 1q
Tamm-Horsfall binding to C 1q and C 1 558
computational immunology
Computational immunology 248
computer simulation
Recognition of mutants in human immunodeficiency virus infection 307
CoMSIA
Quantitative computational vaccinology 270
cornea
Macrophage inflammatory protein-2/vascular endothelial growth factor in corneal neovascularization 323
corneal epithelial cells
Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
costimulation
Interaction between CD56 and fibroblast growth factor receptor 1 364
CTL
Susceptibility of mouse keratinocytes to lysis 415
cytokines
Vaccination against tuberculosis with plasmid-encoded cytokines 346
Vaccination with interleukin-2 and interleukin-18 secreting Bacillus Calmette Guerin 209
cytomegalovirus
Combination interferon gene therapy for cytomegalovirus 425
cytoskeleton
Cytoskeletal control of IL-1β mRNA degradation 328
cytotoxic T cells
Control or persistence of hepatitis B virus 101
cytotoxic T lymphocyte
Characterization of herpes simplex virus-specific transgenic mice 156
cytotoxicity
Susceptibility of mouse keratinocytes to lysis 415

D

databases
Computational immunology 248
DC subsets
Dendritic cells: progress with tumour regression 520
degradation
Cytoskeletal control of IL-1β mRNA degradation 328
dendritic cell
Dendritic cell progenitors are CMRF-44+ 216
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
Effect of Flt3 ligand upon murine prostate 370
dendritic cells
Chemokines and dendritic cells 489
Dendritic cell induction of tolerance 509
Dendritic cell subsets in systemic lupus erythematosus 484
Dendritic cells in tolerance and immunity 463
Dendritic cells, chemokines and autoimmune diseases 497
Dendritic cells: progress with tumour regression 520
Experimental autoimmune encephalomyelitis induction with dendritic cells 14
Immunobiology of liver dendritic cells 65
Models of dendritic cell function 469
Non-obese diabetic genes and dendritic cells 198
Nuclear $RelB^+$ cells in human tissues 164
Origins and destinations of dendritic cells 448
Tolerogenic function of immature dendritic cells 477
differentiation
Dendritic cell progenitors are CMRF-44+ 216

DNA vaccine
Vaccination against tuberculosis with plasmid-encoded cytokines 346
downmodulation
Human $CD8^+CD28^-$ T cells 1
drug design
Bioinformatic analysis and design of peptides 286

E
ELISA
Apoptotic cells produce transforming growth factor-β and interleukin-4 537
endothelial cells
Mast cells up-regulate P-selectin and intracellular adhesion model 1 170
Protease inhibitor and interleukin-6 expression 226
endothelium
Recruitment of lymphocytes to the human liver 52
epithelial cells
Human $CD8^+CD28^-$ T cells 1
epitope coverage
Identification of herpes simplex virus T-cell epitopes 300
epitopes
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106
eptiope
Epitope-driven vaccine design 257
experimental autoimmune encephalomyelitis
Experimental autoimmune encephalomyelitis induction with dendritic cells 14
Nitric oxide in experimental autoimmune encephalomyelitis susceptibility 188
extrathymic
Adult hepatic haematopoietic stem cells 45

F
Fas (Apol/CD95)
Activation-induced cell death and the tumour counterattack 131
Fas counterattack phenomenon
Activation-induced cell death and the tumour counterattack 131
Fas ligand (FasL/CD95L)
Activation-induced cell death and the tumour counterattack 131
FGFR
Interaction between CD56 and fibroblast growth factor receptor 1 364
flow cytometry
Apoptotic cells produce transforming growth factor-β and interleukin-4 537
Flt3-ligand
Effect of Flt3 ligand upon murine prostate 370

G
gender
Nitric oxide in experimental autoimmune encephalomyelitis susceptibility 188
gene therapy
Non-viral gene transfer 119
genetic algorithms
Bioinformatic analysis and design of peptides 286
genome
Epitope-driven vaccine design 257
genomics
Computational immunology 248
germinal centre
Does recycling in germinal centres exist? 30
graft rejection
Spontaneous acceptance of liver transplants 93
graft survival
Spontaneous acceptance of liver transplants 93
granuloma formation
Infection of mice with *Mycobacterium avium* 104 544

H
H-2 congenic non-obese diabetic mice
Non-obese diabetic genes and dendritic cells 198
haemopoietic lineage
Models of dendritic cell function 469
heat shock protein
I-Ad epitope of *Mycobacterium avium* 65 kilodalton heat shock protein 574
heat-shock protein-70
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
hepatic drug reactions
Hepatoimmunology: A perspective 36
hepatitis C virus
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106
T-cell apoptosis in the liver 74
hepatitis C
Predicting treatment outcome in hepatitis C virus patients 391
hepatitis
Animal models of autoimmune liver disease 113
hepatocytes
Primary T-cell activation within the liver 84
herpes simplex virus
Characterization of herpes simplex virus-specific transgenic mice 156
hidden Markov model
Identification of herpes simplex virus T-cell epitopes 300
hidden Markov models
Prediction of promiscuous peptides 280
high-zone tolerance
Tolerization and hybridoma production 319
HIV
Identification of herpes simplex virus T-cell epitopes 300
HLA allele
Prediction of promiscuous peptides 280
HLA transgenic mice
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106
HLA
Identification of herpes simplex virus T-cell epitopes 300
HLA-A*0201
Quantitative computational vaccinology 270

HLA-DR
Interleukin-dependent human leucocyte antigens modulation on T cells 138
homeostasis
Human $CD8^+CD28^-$ T cells 1
human immunodeficiency virus
Recognition of mutants in human immunodeficiency virus infection 307
hybridomas
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106
hydrogen-ion concentration
Tamm-Horsfall binding to C 1q and C 1 558

I
IL-18
Vaccination with interleukin-2 and interleukin-18 secreting Bacillus Calmette Guerin 209
IL-1α
Cytoskeletal control of IL-1β mRNA degradation 328
IL-1β
Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
IL-2
Vaccination with interleukin-2 and interleukin-18 secreting Bacillus Calmette Guerin 209
IL-4
Apoptotic cells produce transforming growth factor-β and interleukin-4 537
IL-6
Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
IL-8
Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
immune privilege
Activation-induced cell death and the tumour counterattack 131
immune regulation
Dendritic cell induction of tolerance 509
immune response
Chemokines and dendritic cells 489
immune system homeostasis
Activation-induced cell death and the tumour counterattack 131
immune system
Does recycling in germinal centres exist? 30
Recognition of mutants in human immunodeficiency virus infection 307
immunity
Immunobiology of liver dendritic cells 65
immunodeficiency diseases
Tumour necrosis factor contributes to immunopathology 436
immunoglobulin A
Trends in mucosal immunity in Antarctica 382
immunoglobulin G
Trends in mucosal immunity in Antarctica 382
immunoglobulin M
Trends in mucosal immunity in Antarctica 382
immunohistochemisty
Nuclear $RelB^+$ cells in human tissues 164
immunoinformatics
Prediction of promiscuous peptides 280
immunologic surveillance
Dendritic cells: progress with tumour regression 520
immunoregulation
Regulatory T cells and autoimmunity 567
Origins and destinations of dendritic cells 448
immunostimulatory effect
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
immunosuppressive agents
Spontaneous acceptance of liver transplants 93
immunotherapy
Combination interferon gene therapy for cytomegalovirus 425
Dendritic cells: progress with tumour regression 520
importin
Non-viral gene transfer 119
inflammation
Activation-induced cell death and the tumour counterattack 131
Mast cells up-regulate P-selectin and intracellular adhesion model 1 170
Thoracic duct lymphoblasts in arthritis 148
Tumour necrosis factor contributes to immunopathology 436
α-Lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
innate immunity
Control or persistence of hepatitis B virus 101
innate
Adult hepatic haematopoietic stem cells 45
interleukin-12
Interleukin-dependent human leucocyte antigens modulation on T cells 138
interleukin-2
CD25 and interleukin-2 signal transduction 351
Interleukin-dependent human leucocyte antigens modulation on T cells 138
interleukin-4
Interleukin-dependent human leucocyte antigens modulation on T cells 138
interleukin-6
Protease inhibitor and interleukin-6 expression 226
intracellular adhesion molecule 1
Mast cells up-regulate P-selectin and intracellular adhesion model 1 170
intrahepatic lymphocytes
Hepatoimmunology: A perspective 36
intranasal immunization
Mucosal immunity in the possum 358

K
keratinocytes
Susceptibility of mouse keratinocytes to lysis 415
KMP11
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241

Kupffer cells
Primary T-cell activation within the liver 84

L
liver autoimmunity
Hepatoimmunology: A perspective 36
liver disease
Immunobiology of liver dendritic cells 65
liver sinusoidal endothelial cells
Primary T-cell activation within the liver 84
liver transplantation
Spontaneous acceptance of liver transplants 93
liver
Immunobiology of liver dendritic cells 65
Primary T-cell activation within the liver 84
Recruitment of lymphocytes to the human liver 52
T-cell apoptosis in the liver 74
α-Lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
lung epithelial cell
Apoptotic cells produce transforming growth factor-β and interleukin-4 537
lymphocyte homing
Recruitment of lymphocytes to the human liver 52
lymphocytes
Thoracic duct lymphoblasts in arthritis 148

M
M protein
Fine specifity of streptococcal vaccine 178
macrophage inflammatory protein-2 (MIP-2)
Macrophage inflammatory protein-2/vascular endothelial growth factor in corneal neovascularization 323
macrophages
Macrophages in rat yolk sac 441
major histocompatibility complex class I
Characterization of herpes simplex virus-specific transgenic mice 156
Human $CD8^+CD28^-$ T cells 1
major histocompatibility complex
Bioinformatic analysis and design of peptides 286
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106
malaria
Immunity to asexual blood stage malaria 401
mast cells
Mast cells up-regulate P-selectin and intracellular adhesion model 1 170
maturation
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
MEK1/2
Protease inhibitor and interleukin-6 expression 226
MG-132
Protease inhibitor and interleukin-6 expression 226
MHC
Quantitative computational vaccinology 270
microdomain
CD25 and interleukin-2 signal transduction 351
migration
Origins and destinations of dendritic cells 448
mixed-leucocyte reaction
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
molecular interaction
Bioinformatic analysis and design of peptides 286
monoclonal antibodies
Tolerization and hybridoma production 319
mRNA
Cytoskeletal control of IL-1β mRNA degradation 328
mucosal immunity
Mucosal immunity in the possum 358
Trends in mucosal immunity in Antarctica 382
mucosal immunization
Route of administration of chimeric BPV1 virus-like particles 21
murine models
Animal models of autoimmune liver disease 113
murine
Effect of Flt3 ligand upon murine prostate 370
mycobacteria
I-Ad epitope of *Mycobacterium avium* 65 kilodalton heat shock protein 574
Mycobacterium avium strains
Infection of mice with *Mycobacterium avium* 104 544

N
naked DNA
Combination interferon gene therapy for cytomegalovirus 425
neonatal tolerance
Tolerization and hybridoma production 319
neovascularization
Macrophage inflammatory protein-2/vascular endothelial growth factor in corneal neovascularization 323
NFκB
Dendritic cell induction of tolerance 509
nitric oxide
Nitric oxide in experimental autoimmune encephalomyelitis susceptibility 188
NK cells
Interaction between CD56 and fibroblast growth factor receptor 1 364
non-MHC non-obese diabetic genes
Non-obese diabetic genes and dendritic cells 198
nuclear factor-κB
α-lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
nuclear localization sequence
Non-viral gene transfer 119
nuclear targeting signal
Non-viral gene transfer 119

P
papillomavirus
Route of administration of chimeric BPV1 virus-like particles 21
peptide binding
Prediction of promiscuous peptides 280
peptide
Identification of herpes simplex virus T-cell epitopes 300

peripheral tolerance
Tolerogenic function of immature dendritic cells 477
predictive modelling
Prediction of promiscuous peptides 280
primary biliary cirrhosis
Hepatoimmunology: A perspective 36
primary T-cell activation
Primary T-cell activation within the liver 84
prostate
Effect of Flt3 ligand upon murine prostate 370
protease inhibitor
Protease inhibitor and interleukin-6 expression 226
protective efficacy
Vaccination against tuberculosis with plasmid-encoded cytokines 346
protein binding
Tamm-Horsfall binding to C 1q and C 1 558
P-selectin
Mast cells up-regulate P-selectin and intracellular adhesion model 1 170
Pseudomonas aeruginosa
Dihydroxyvitamin D_3 inhibits interleukin-1β, interleukin-6 and interleukin-8 341
Pseudomonas aeruginosa
Macrophage inflammatory protein-2/vascular endothelial growth factor in corneal neovascularization 323

R
Rac2
T-cell defects in Rac2-deficient mice 231
rat
Macrophages in rat yolk sac 441
recirculation
Primary T-cell activation within the liver 84
recycling hypothesis
Does recycling in germinal centres exist? 30
regulatory T cells
Tolerogenic function of immature dendritic cells 477
RelB
Nuclear RelB$^+$ cells in human tissues 164
rheumatic fever
Fine specifity of streptococcal vaccine 178
rheumatoid arthritis
Thoracic duct lymphoblasts in arthritis 148
rodent
Tumour necrosis factor contributes to immunopathology 436

S
saliva
Trends in mucosal immunity in Antarctica 382
self organizing maps
Bioinformatic analysis and design of peptides 286
self-peptide
Experimental autoimmune encephalomyelitis induction with dendritic cells 14
signal transduction
CD25 and interleukin-2 signal transduction 351
skin
Susceptibility of mouse keratinocytes to lysis 415
stem cells
Adult hepatic haematopoietic stem cells 45
Streptococcus pyogenes
Fine specifity of streptococcal vaccine 178
stress
Trends in mucosal immunity in Antarctica 382
subtractive immunization
Tolerization and hybridoma production 319
systemic lupus erythematosus
Dendritic cell subsets in systemic lupus erythematosus 484

T
T cell activation
Infection of mice with *Mycobacterium avium* 104 544
T cell clone
I-Ad epitope of *Mycobacterium avium* 65 kilodalton heat shock protein 574
T cell epitope
I-Ad epitope of *Mycobacterium avium* 65 kilodalton heat shock protein 574
T cell receptor
Characterization of herpes simplex virus-specific transgenic mice 156
T cell
Epitope-driven vaccine design 257
T cells
Dendritic cells in tolerance and immunity 463
T lymphocyte
T-cell apoptosis in the liver 74
T lymphocytes
Regulatory T cells and autoimmunity 567
Interaction between CD56 and fibroblast growth factor receptor 1 364
T-cell defects in Rac2-deficient mice 231
Tamm-Horsfall protein
Tamm-Horsfall binding to C 1q and C 1 558
T-cell development
Adult hepatic haematopoietic stem cells 45
T-cell epitope prediction
Identification of herpes simplex virus T-cell epitopes 300
TGF-β
Apoptotic cells produce transforming growth factor-β and interleukin-4 537
Th1 cells
Experimental autoimmune encephalomyelitis induction with dendritic cells 14
Th1 responses
Dendritic cell progenitors are CMRF-44+ 216
T_H1/T_H2
T-cell defects in Rac2-deficient mice 231
Th2 cells
Experimental autoimmune encephalomyelitis induction with dendritic cells 14
thoracic duct
Thoracic duct lymphoblasts in arthritis 148
thymus
Characterization of herpes simplex virus-specific transgenic mice 156
T-lymphocytes
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106

tolerance
Dendritic cells in tolerance and immunity 463
Regulatory T cells and autoimmunity 567
Immunobiology of liver dendritic cells 65
Models of dendritic cell function 469
Primary T-cell activation within the liver 84
transcript stability
Cytoskeletal control of IL-1β mRNA degradation 328
transcription factors
α-Lipoic acid inhibits nitric oxide and tumour necrosis factor-α 550
transgenic cell receptor
Characterization of herpes simplex virus-specific transgenic mice 156
transgenic mice
Models of dendritic cell function 469
transgenic/knockout
Tumour necrosis factor contributes to immunopathology 436
Animal models of autoimmune liver disease 113
transplantation tolerance
Spontaneous acceptance of liver transplants 93
transplantation
Primary T-cell activation within the liver 84
Trypanosoma cruzi
Dendritic cell maturation by *Trypanosoma cruzi* heat-shock protein-70 241
tuberculosis
Vaccination against tuberculosis with plasmid-encoded cytokines 346
Vaccination with interleukin-2 and interleukin-18 secreting Bacillus Calmette Guerin 209
tumour escape
Dendritic cells: progress with tumour regression 520
type I interferon
Combination interferon gene therapy for cytomegalovirus 425

V
vaccination
Vaccination with interleukin-2 and interleukin-18 secreting Bacillus Calmette Guerin 209
vaccine
Epitope-driven vaccine design 257
Immunity to asexual blood stage malaria 401
vascular endothelial growth factor (VEGF)
Macrophage inflammatory protein-2/vascular endothelial growth factor in corneal neovascularization 323
viral hepatitis
Control or persistence of hepatitis B virus 101
viral immunology
Hepatitis C virus epitopes in human histocompatibility leucocyte antigen Tg mice 106

Y
yolk sac
Macrophages in rat yolk sac 441
